

# International Number Ones

Because every country is the best at something  
according to data

2016 edition

David McCandless // v 2.1 / Oct 2016  
Research: David McCandless, Stephanie Smith, Esther Kersley  
Additional Design: Fabio Bergamaschi

Sources: CIA, NYTimes, Bloomberg, UN, The Economist, World Bank, Reuters, BBC, Forbes, The Guardian, WSJ & others. // data: [https://bit.ly/1IB\\_IntlNoOnes](https://bit.ly/1IB_IntlNoOnes) mostly per capita / % of population data // very small countries excluded

InformationIsBeautiful.net

This image is a quick snapshot of data; but quite thought provoking - which countries have "good" number ones, and which have "bad" or negative number ones - would be an interesting extra layer of coding.
